How to be cautious about misleading graphs and statistics?

Graphs and charts are great at conveying complex statistics to a general audience.

What graphs are also great at is misleading people into making wrong conclusions about the world. Some media mislead because of their incompetence in statistics,

A baseline is zero on the vertical scale. Graphs that have a missing baseline and start at some arbitrary number (34 on the Fox News image) tend to be very misleading. When you look at a graph and try to figure out if it's a true representation of what's really going on, check that baseline. Misleading Graphs:
