4M40, as previously stated, has a timing chain, which in and of itself is a big reason to have it. Also has more HP, which the 4D56 certainly doesn't have an abundance of. But another reason many like the 4m40 is because it also came in a vehicle with stronger components overall, ie bigger diffs, etc.

This book proposes a uniform logic and probabilistic (LP) approach to risk estimation and analysis in engineering and economics. It covers the methodological and theoretical basis of risk management at the design, test, and operation stages of economic, banking, and engineering systems with groups of incompatible events (GIE). This edition includes new chapters providing a detailed treatment of scenario logic and probabilistic models for revealing bribes. It also contains clear definitions and notations, revised sections and chapters, an extended list of references, and a new subject index, as well as more than a hundred illustrations and tables which motivate the presentation.
