Airguide barometer | Etsy

This Airguide hygrometer probably dates from the 1950s. It uses a metal-paper sensor coil directly connected to the indicator needle. The coil consists of a salt-impregnated paper strip attached to a metal coil. As the paper strip absorbs or releases moisture it causes the metal coil to wind/unwind, much like a bimetallic thermometer coil. The use of metal-paper coils is generally limited to inexpensive instruments as the accuracy is roughly +/-10% relative humidity.

Airguide Barometer [2 Answers]
I have a Airguide Barometer with humidity and temperature indicators as well. The Barometer looks like 60's era equipment. It is an indoor unit wood frame, glass front w/dial indicators and I keep it in the living room. The Barometer reading was 26.5 but online the weather statistics indicated...

Airguide barometer - Ask Me Help Desk

In 1980 Airguide filed for bankruptcy protection, and was subsequently sold to the Johnson Wax Company. Johnson stopped selling products under the Airguide name in 2000. A 1938 (?) catalog for Airguide weather products may be downloaded below (4 pages):

Barometer Thermometer ...

A barometer measures air pressure and can forecast the weather within a 12 to 24 hour period. Air pressure can be measured in inches of mercury, millimeters of mercury, or hectopascals, depending on where you live and the gauge on the instrument.
