proceedings of the 10th International Conference on Cognitive Radio Oriented Wireless Networks, CROWNCOM 2015, held in Doha, Qatar, in April 2015. The 66 revised full papers presented were carefully reviewed and selected from 110 submissions and cover the evolution of cognitive radio technology pertaining to 5G networks. The papers are clustered to topics on dynamic spectrum access/management, networking protocols for CR, modeling and theory, HW architecture and implementations, next generation of cognitive networks, standards and business models, and emerging applications for cognitive networks.

nature and value of altruism as a moral virtue, restoring it to its proper place at the centre of our moral and political thinking. The first five essays in the collection explore the relationship between altruism and other moral concepts such as self-interest, autonomy, community and impartiality. The five essays in the second part show how altruism is invoked in practical moral problems, including aid to developing countries, the market for human body parts, multiculturalism and the politics of recognition, and medical ethics. Through these discussions, the central role of altruism in moral thinking is brought into sharper focus.

A practical guide to LTE design, test and measurement, this new edition has been updated to include the latest developments This book presents the latest details on LTE from a practical and

technical perspective. Written by Agilent's measurement experts, it offers a valuable insight into LTE technology and its design and test challenges. Chapters cover the upper layer signaling and system architecture evolution (SAE). Basic concepts such as MIMO and SC-FDMA, the new uplink modulation scheme, are introduced and explained, and the authors look into the challenges of verifying the designs of the receivers, transmitters and protocols of LTE systems. The latest information on RF and signaling conformance testing is delivered by authors participating in the LTE 3GPP standards committees. This second edition has been considerably revised to reflect the most recent developments of the technologies and standards. Particularly important updates include an increased focus on LTE-Advanced as well as the latest testing specifications. Fully updated to include the latest information on LTE 3GPP standards

Chapters on conformance testing have been majorly revised and there is an increased focus on LTE-Advanced Includes new sections on testing challenges as well as over the air MIMO testing, protocol testing and the most up-to-date test capabilities of instruments  
Written from both a technical and practical point of view by leading experts in the field

writing skills into their careers. By teaching genres of writing (analyses, reports, proposals, etc.), strategies for writing (narration, comparison, argumentation, etc.), and processes for writing (planning, drafting, revising, etc.), Writing Today provides students with tools they can mix and match as needed to respond effectively to many writing situations both in school and beyond. Writing Today offers students the comprehensive and detailed instruction they need using a highly-praised, interactive writing style that reflects the way they read and learn: instruction is succinct; key concepts are immediately defined and reinforced; paragraphs are short and supported by instructional visuals. This interactive presentation helps students ask questions of the text, raid it for answers, and access knowledge when they are ready for it, putting students in control of their learning. With the clear and

researchers, practicing industrial engineers and designers who work with antennas in radio frequency (RF) engineering, EMC, radar, and radio communications. This book will provide the reader with a firm theoretical and practical understanding of the RCs operation, allowing them to undertake practical antenna and EMC measurement work with confidence and accuracy. The book is built on many years of research by the authors that encompass many of the new advances in antenna design.
