

### Borchl Gel L 75 N Borchers Home

Recognizing the exaggeration ways to acquire this book **borchl gel l 75 n borchers home** is additionally useful. You have remained in right site to start getting this info. get the borchl gel l 75 n borchers home partner that we pay for here and check out the link.

You could buy lead borchl gel l 75 n borchers home or acquire it as soon as feasible. You could speedily download this borchl gel l 75 n borchers home after getting deal. So, subsequently you require the ebook swiftly, you can straight get it. It's consequently no question easy and correspondingly fats. isn't it? You have to favor to in this make public

*Borchl Gel L 75 N*
**Borchl**
**@**
**Gel L 75 N**
is a polyurethane-based, non-ionic liquid rheology modifier for pigment wetting and stabilization that is VOC-, APEO-, and organo tin-free. It is a HEUR thickener that develops viscosity stability in water-based coatings mainly in the medium shear range.

*Rheology Modifier for Pigment Wetting | Borchl@ Gel L 75 N ...*

The thickening action of Borchl@Gel L 75 N may be reduced by polar, water soluble film forming solvents such as alcohols, glycols and glycol ethers. However, low polar solvents such as butyl diglycol acetate and Texanol®will increase the viscosity effect.

*Borchl@ Gel L 75 N*

Borchl@ Gel L 75 N improves rheological properties for easier brush and roller application, and does not yellow or cause chalking in the cured film. It is used in acrylic gloss-, anti-corrosion- and small particle size emulsion coatings. The recommended dosage is 0.1-2.0% on total paint formulation.

*Borchl@ Gel L 75 N - Borchers - datasheet*

Borchl Gel L 75 N Borchl @ Gel L 75 N is a polyurethane-based, non-ionic liquid rheology modifier for pigment wetting and stabilization that is VOC-, APEO-, and organo tin-free. It is a HEUR thickener that develops viscosity stability in water-based coatings mainly in the medium shear range. *Borchl Gel L 75 N Borchers Home | www.uppercasing*

Borchl@ Gel L 75 N is a polyurethane based, non-ionic liquid thickener. It acts as a flow promoter in emulsion paints and stabilizes pigmented aqueous paints. The particular molecular structure of Borchl@ Gel L 75 N allows its adsorption at the surface of dispersed particles formed as a result of emulsion polymerisation. It is characterised by good efficiency. It improves the rheological ...
