mixture into an engine to be ignited by a spark plug which drives the piston and produces the power output in an internal combustion engine.

Problems with the carburetor can manifest in many ways including the engine not starting, idling low, idling high, sputtering, dying, and producing black smoke exhaust.

If the engine is emitting black smoke, this could mean that the air filter is dirty, the fuel could have gone bad, and/or the carburetor is flooded.

Start by checking your air filter, if it looks okay, move onto replacing the gas. If the problem continues, refer to the
