Building plans are the set of drawings which consists of floor plan, site plan, cross sections, elevations, electrical, plumbing and landscape drawings for the ease of construction at site. Drawings are the medium of passing the views and concepts of an architect or designer into reality.

~~Different Types of Building Plans The Constructor~~

The term ‘elevation’ refers to an orthographic projection of the exterior (or sometimes the interior) faces of a building, that is a two-dimensional drawing of the building’s façades. As buildings are rarely simple rectangular shapes in plan , an elevation drawing is a first angle projection that shows all parts of the building as seen from a particular direction with the perspective flattened.

~~Types of drawings for building design Designing ...~~

My interior design project. We’ve just moved in to our new apartment! What we liked most about it was its open-plan kitchen leading onto the living room. It makes it a very inviting, spacious area. But the décor was not to our taste. I chose to base the new décor of this space on the Scandinavian style I really like!
