To start the CICS Resource Definition tool, click CICS on the Tools menu, and then click Resource Definition. An ISPF-type screen is displayed. An ISPF-type screen is displayed. Use the function keys to select the operation that you want to perform, as shown at the bottom of the screen.

CICS Resource Definitions - Support Resources
The resource definitions stored by CICS Option are different in both content and form to those stored on the mainframe. Many resource types and attributes that you can define on the mainframe are meaningless in the Windows environment, for example LSRPOOL.

CICS Resource Definitions - Support Resources
The System Definition Guide explains how to specify and install the system definitions for a CICS region. It describes how to define CICS data sets and initialize a CICS region. It contains information for experienced

system programmers. System Definition Guide. CICS Transaction Serverfor z/OS®SystemDefinition Guide.

CICS Transaction Server for z/OS® System Definition Guide
Your CICS system has to know which resources to use, what their properties are, and how they interact with each other. You supply this information to CICS by resource definition: Resource definition online (RDO): This method uses the CICS-supplied online transactions CEDA, CEDB, and CEDC. Definitions are stored on the CICS system definition (CSD) file, and installed into an active CICS system from the CSD file.

Cics Resource Definition Guide - v1docs.bespokify.com
CICS Resource Definition Guide. The RCT or DB2 attachment facility contains the information required for CICS to establish its connection to DB2. The FILE transaction's DB2 facility lets you view information and statistics on each entry in the active RCT. The display format is presented as if the RCT existed as a DB2 table.

Using CA InterTest for CICS with

DB2 and SQL/DS Programs
CICS provides the ability to use a dynamic library definition to dynamically allocate and concatenate the load library data sets to the ddname DFHRPL. You can dynamically add definitions to the CICS CSD file using the CICS DFHCSDUP utility.

Update the CICS Tables (INST0060)
If all the TSMODEL resource definitions with a nonzero expiry interval are deleted from a CICS region, CICS stops scanning for expired temporary storage queues. GROUP (groupname) Every resource definition must have a GROUP name. The resource definition becomes a member of the group and is

installed in the CICS system when the group is installed.

TSMODEL attributes
Create a CICS resource definition file using following command: caspcrd /c /dp=c:\ProjectLocation\ acctweb\system; For CICS Web support a new group has been added to the system. To ensure this group appears on the list of available groups to add to your resources, upgrade the resource definition file by running the following command:

Create and Upgrade the CICS Resource Definition File
CICS is an operating system in itself, as it manages its own processor storage, has its own task manager which handles

execution of multiple programs, and provides its own file management functions. CICS provides online environment in batch operating system. Jobs submitted are executed immediately.
