Environment? - Scientific ...

In this new edition of his landmark 1986 study, pioneering anthropologist Elliott Leyton examines the psyche and motivations of his six original multiple-murderer subjects and now takes stock of how far we've come since then in our understanding of why people commit gruesome assaults on innocent strangers. This case-study approach -- based on years of immersion in the killers' diaries ...

## Hunting Humans: The Rise of the Modern Multiple Murderer ...

Humans began to evolve about seven million years ago, and progressed through four stages of evolution. Research shows that the first modern humans appeared 200,000 years ago. Neanderthals were a separate species from humans. Although they had larger brain capacity and interbred with humans, they eventually died out.
