What makes a place? Rebecca Solnit reinvents the traditional atlas, searching for layers of meaning & connections of experience across San Francisco.

“The maps themselves are things of beauty.” –The New York Times Explore the hidden histories of San Francisco, New Orleans, and New York with this brilliant reinvention of the traditional atlas. From Rebecca Solnit, Rebecca Snedeker, and Joshua Jelly-Schapiro. In the past decade, Rebecca Solnit-aided by local writers, artists, historians, urbanists, ethnographers, and cartographers—has compiled three stunning atlases that have radically changed the way we think about place. Each atlas provides a vivid, complex look at the multi-faceted nature of a city as experienced by its different inhabitants, replete with the celebrations and contradictions that make up urban life. This three-volume paperback set contains: The original, gorgeously designed atlases—Infinite City: A San Francisco Atlas; Unfathomable City: A New Orleans Atlas; and Nonstop Metropolis: A New York City Atlas Three new and updated, full-color, fold-out posters for each city, including the popular “City of Women” map A new and thoughtful essay by Rebecca Solnit reflecting on the project ten years after the publication of the first atlas A stunning collection, this boxed set is a perfect treasury of imagination and insight, a rich people’s history of these infinite cities.

Presents twenty-two color maps and accompanying essays providing details on the people, ecology, and culture of the city.

“Nonstop Metropolis, the culminating volume in a trilogy of atlases, conveys innumerable unbound experiences of New York City through twenty-six imaginative maps and informative essays. Bringing together the insights of dozens of experts—from linguists to music historians, ethnographers, urbanists, and environmental journalists—amplified by cartographers, artists, and photographers, it explores all five boroughs of New York City and parts of nearby New Jersey. We are invited to travel through Manhattan’s playgrounds, from polyglot Queens to many-faceted Brooklyn, and from the resilient Bronx to the mystical kung fu hip-hop mecca of Staten Island. The contributors to this exquisitely designed and gorgeously illustrated volume celebrate New York City’s unique vitality, its incubation of the avant-garde, and its literary history, but they also critique its racial and economic inequality, environmental impact, and erasure of its past. Nonstop Metropolis allows us to excavate New York’s buried layers, to scrutinize its political heft, and to discover the unexpected in one of the most iconic cities in the world. It is both a challenge and homage to how New Yorkers think of their city, and how the world sees this capital of capitalism, culture, immigration, and more.” -- Publisher’s description.

Winner of the National Book Critics Circle Award for Criticism and the Mark Lynton History Prize Through the story of the pioneering photographer Eadweard Muybridge, the author of Recollections of My Nonexistence explores what it was about California in the late 19th-century that enabled it to become such a center of technological and cultural innovation The world as we know it today began in California in the late 1800s, and Eadweard Muybridge had a lot to do with it. This striking assertion is at the heart of Rebecca Solnit’s new book, which weaves together biography, history, and fascinating insights into art and technology to create a boldly original portrait of America on the threshold of modernity. The story of Muybridge—who in 1872 succeeded in capturing high-speed motion photographically—becomes a lens for a larger story about the acceleration and industrialization of everyday life. Solnit shows how the peculiar freedoms and opportunities of post-Civil War California led directly to the two industries—Hollywood and Silicon Valley—that have most powerfully defined contemporary society.

Publisher Description

Reporting from the front lines of gentrification in San Francisco, Rebecca Solnit and Susan Schwartzberg sound a warning bell to all urban residents. Wealth is just as capable of ravaging cities as poverty.

Armed with hundreds of blank maps she had painstakingly printed by hand, Becky Cooper walked Manhattan from end to end. Along her journey she met police officers, homeless people, fashion models, and senior citizens who had lived in Manhattan all their lives. She asked the strangers to “map their Manhattan” and to mail the personalized maps back to her. Soon, her P.O. box was filled with a cartography of intimate narratives: past loves, lost homes, childhood memories, comical moments, and surprising confessions. A beautifully illustrated, PostSecret-style tribute to New York, Mapping Manhattan includes 75 maps from both anonymous mapmakers and notable New Yorkers, including Man on Wire aerialist Philippe Petit, New York Times wine critic Eric Asimov, Tony award-winning actor Harvey Fierstein, and many more. Praise for Mapping Manhattan: “What an intriguing project.”—The New York Times “A tender cartographic love letter to this timeless city of multiple dimensions, parallel realities, and perpendicular views.” —Brain Pickings “Cooper’s beautiful project linking the lives of New Yorkers is one that will continue to grow.” —Publishers Weekly online

How has California’s landscape changed? What did now-familiar places look like during prior centuries? What can the past teach us about designing future landscapes? The Napa Valley Historical Ecology Atlas explores these questions by taking readers on a dazzling visual tour of Napa Valley from the early 1800s onward—a forgotten land of brilliant wildflower fields, lush wetlands, and grand oak savannas. Robin Grossinger weaves together rarely-seen historical maps, travelers’s accounts, photographs, and paintings to reconstruct early Napa Valley and document its physical transformation over the past two centuries. The Atlas provides a fascinating new perspective on this iconic landscape, showing the natural heritage that has enabled the agricultural success of the region today. The innovative research of Grossinger and his historical ecology team allows us to visualize the past in unprecedented detail, improving our understanding of the living landscapes we inhabit and suggesting strategies to increase their health and resilience in the future.
