This book Irrigation & Agricultural Drainage Engineering is intended as a source book in the area of irrigation and drainage for the students of agricultural engineering in particular and agricultural science in general. However, this book also may be useful for agricultural extension workers and the professional working in this area. The contents of the book will enable one to acquire some basic requirements which an irrigation and drainage manager must have. The contents include basics along with some information toward research achievements, importance and usefulness so that the students get interested to the subject and at the same time help them to attend the institutional and competitive examinations. The book contains good numbers of numerical as example and task to get the students familiar to the requirements, complicacies, and possible remedies in actual working condition.

This study is conducted under the Asian Development Bank (ADB) project for Strengthening Gender-Inclusive Growth in Central and West Asia. It aims to establish a better understanding of women's roles in irrigated agriculture and water management in Tajikistan. The findings will inform the ADB grant-financed project to modernize irrigation and drainage systems in the Lower Vaksh River Basin. The study examined women's roles and gender gaps in land operation and farming, labor arrangements in agriculture and water management, and feminization of agriculture. It reinforces the need for gender inclusiveness in planning and designing irrigation and drainage projects, ensuring benefits for all.
