Since its initial publication in 1979, Sources for the Study of Greek Religion has become an essential classroom resource in the field of classical studies. The Society of Biblical Literature is pleased to present a corrected edition—in a new, attractive, and electronic-friendly format—with hopes that it will inspire a new generation of classicists and religious historians.

This book provides an overview of the theory, practice and context of entrepreneurship and innovation at both the industry and firm level. It provides a foundation of ideas and understandings designed to shape the reader’s thinking and behaviour to better appreciate the role of innovation and entrepreneurship in modern economies, and to recognise their own abilities in this regard. The book is aimed at students studying advanced levels of entrepreneurship, innovation and related fields as well as practitioners (for example, managers, business owners). As entrepreneurship and innovation are largely indivisible elements and cannot be adequately understood if studied separately, the book provides the reader with an overview of these elements and how they combine to create new value in the market. This edition is updated with recent international research, including research and examples from Europe, the US, and the Asia-Pacific region.

From the people who turned teacher education on its ear in Australia in 2001 comes a text about preparing the next generation of teachers. Richard Smith and David Lynch, two of Australia's leading teacher education researchers and the architects of the acclaimed Bachelor of Learning Management program (BLM), take their previously published ideas about teaching and teacher education further to detail a new paradigm in the preparation of teachers. Drawing on 30 years of teacher education research and their own experiences in redeveloping teacher education in Australia, Smith and Lynch explore what it means to be a teacher in the 2000s, outlining a new vision for the preparation of teachers in a Knowledge Age.
