SAP S/4HANA Change Management: How to Handle the People Side of Your Transformation. Organizational change is a key component of any SAP S/4HANA transformation or implementation of any of the top ERP systems. But too often, organizations limit their scope of change to myopically focus on end-user training. When we are close to the day-to-day details of a digital transformation, we assume that we just need to train people once we figure out the new processes and technologies.

The Engineering Change Management (ECM) is used to track and control all the changes with reference to Material master, BOM, Work Center & Routing. The first step you need to do is to create a Change master thru CC01 T-code. The system will give you one change number. Using this number you can change all the masters record.
