Top Fuel Dragsters are the fastest racing cars on the planet. Powered by huge 8,000bhp engines, the quickest cars can accelerate from 0 to 100mph in less than a second, reaching over 330mph by the end of a quarter-mile timed run. The noise and spectacle of a Top Fuel Dragster in action is truly astonishing. This fascinating manual provides a unique insight into the engineering of these incredible machines, and takes a look behind the scenes from the perspective of the driver and team members to explain how the cars are designed, built, maintained and driven.

This comprehensive guide will help you through the entire process, from engine repair to bodywork. Don't begin that restoration project without Porter's professional techniques.
