And Solutions And

Set Theory Problems:
Solutions 1. True.

Suppose $(a;c) \subseteq A \subseteq C$.

Then $a \in A$ and, since $A \subseteq B$, we have that $a \in B$.

Similarly, $c \in C$ and $C \subseteq D$ implies $c \in D$.

Therefore, $(a;c) \subseteq B \cap D$.

We may conclude that $A \subseteq B \cap D$. 2. True.

There are many such bijections; the

No exercises. 1.3 The Axioms | Exercise 1

(1.3.1). Show that the set of all x such that $x \in A$ and $x \in B$ exists.

Proof. Notice that $x \in A$ and $x \in B \iff x \in A \cap B$. Then by the Axiom Schema of Comprehension, we know that such a set does exist. | Exercise
