The essays in this volume examine institutional change in five of the most important areas of economic life in central and eastern Europe after 1989: international and regional economic reintegration; the restructuring of the industrial base; how economic interests are to be represented; fiscal and budgetary reform; and reform of the social welfare system. The editors use these research findings to buttress a somewhat heterodox theory of institutional dynamics, one pointing to "discursive structures" and "governance structures" as key dimensions that, in combination, affect institutional change in this part of the world so that an economic "revolution" becomes an evolutionary processes of gradual transition.

The overriding philosophy of this text is to provide the instructor with comprehensive coverage of ethical and professional issues encountered by accounting professionals. The book is devoted to helping students cultivate the ethical commitment needed to ensure that their work meets the highest standards of integrity, independence, and objectivity. Ethical Obligations and Decision Making in Accounting is designed to provide the instructor with the best flexibility and pedagogical effectiveness of any book on the market. To that end, it includes numerous features designed to make both learning and teaching easier.
