Take Earth and Space Science instruction higher with the first ever high school program built with National Geographic content, images, and Explorers. Presents a rich overview of Earth and Space-related disciplines: exploring the physical attributes of planet Earth and its environment, emphasizing the human choices we have made, and discussing the physical consequences of those choices in the context of Earth systems. Address the Next Generation Science Standards to ensure your students meet current science skills and practices by integrating 3-Dimensional Learning. Available digitally in the MindTap platform with interactive elements including videos, animations, and assessments.

STEM Labs for Earth and Space Science for sixth -- eighth grades provides 26 integrated labs that cover the topics of: -geology -oceanography -meteorology -astronomy The integrated labs encourage students to apply scientific inquiry, content knowledge, and technological design. STEM success requires creativity, communication, and collaboration. Mark Twain ' s Earth and Space Science workbook for middle school explains STEM education concepts and provides materials for instruction and assessment. Each lab incorporates the following components: -creativity -teamwork -communication -critical thinking From supplemental books to classroom d é cor, Mark Twain Media Publishing Company specializes in providing the very best products for middle-grade and upper-grade classrooms. Designed by leading educators, the product line covers a range of subjects, including language arts, fine arts, government, history, social studies, math, science, and character.

Connect students in grades 6 and up with science using Science Tutor: Earth and Space. This effective 48-page resource provides additional concept reinforcement for students who struggle in earth and space science. Each lesson in this book contains an Absorb section to instruct and simplify concepts and an Apply section to help students grasp concepts on their own. The book covers topics such as the layers of the earth, types of rock, how rock is formed, weather, the phases of the moon, and Earth ' s place in the solar system. It also highlights key terms in the text and includes a recap of the metric system. The book supports National Science Education Standards.

Earth

Encourage students to create their own learning portfolios with Interactive Notebook: Earth and Space Science for grades five through eight. This interactive notebook for science students includes 29 lessons in these four units of study: -geology -oceanography -meteorology -astronomy This personalized resource helps students review and study for tests. Mark Twain Media Publishing Company specializes in providing engaging supplemental books and decorative resources to complement middle- and upper-grade classrooms. Designed by leading educators, this product line covers a range of subjects including mathematics, sciences, language arts, social studies, history, government, fine arts, and character.

Homework Helpers: Earth Science covers all of the topics typically included in a high school or undergraduate course, including: How to understand "the language of rocks." The events that we see in the sky and how they affect us. Earthquakes and what they can tell us about the inside workings of our world. How to understand the weather and what the weatherman is saying. Homework Helpers: Earth Science is loaded with practical examples using everyday experiences. Every topic includes a number of simple tricks to make even the toughest ideas understandable and memorable. Each chapter ends with practice questions and explanations of answers. As a reference tool

Homework Helpers: Earth Science can be used as a preview of tomorrow--class or a reinforcement of today--. It will leave students with a firm grasp of the material and the confidence that will inspire a deeper understanding.
