Study description. ELSA is an ongoing study of a nationally representative sample of the English population aged ≥50 years¹². Participants were recruited from households that were included in the Health Survey for England in 1998, 1999 and 2001, and then followed up every 2 years with detailed health examinations through nurse visits taking place every 4 years.

The structure and predictive value of intrinsic capacity ...

The qualities of an effective mentor from the student nurse's perspective: findings from a longitudinal qualitative study. Parker and Carlisle (Journal of Advanced Nursing24, 771-778) argue that there is a scarcity of empirical research focusing on issues such as supernumerary status and mentorship in Project 2000 courses from the students' perspective.
