The B-theory of time is the name given to one of two positions regarding the temporal ordering of events in the philosophy of time. B-theorists argue that the flow of time is an illusion, that the past, present, and future are equally real, and that time is tenseless. This would mean that temporal becoming is not an objective feature of reality. The B-theory is derived from a distinction drawn by J.M.E. McTaggart between A series and B series. The B-theory is often drawn upon in theoretical phys

~~B-theory Of Time—eLife.org~~

The tenseless theory of time (also known as the B-theory, based on McTaggart ’ s B-series method of ordering events) calls for the elimination of all talk of past, present and future in favour of a tenseless ordering of events using only phrases like “ earlier than ” or “ later than ”. The argument behind this is that tensed terminology can be adequately replaced with tenseless terminology, e.g. the future-tensed sentence, “ we will win the game ” can be adequately expressed as, “ we ...

This is the B series, and the philosophy which says all truths about time can be reduced to B series statements is the B-theory of time. Distinctions. The logic and the linguistic expression of the two series are radically different. The A series is tensed and the B series is tenseless. For example, the assertion “today it is raining” is a tensed assertion because it depends on the temporal perspective—the present—of the person who utters it, while the assertion “It rained on 3 September ...

According to the new tenseless theory of time, our need to think and talk in tensed terms is perfectly consistent with its being the case that time is timeless. Tensed discourse is indeed necessary for timely action, but tensed facts are not, since the truth conditions of tensed sentences can be expressed in a tenseless metalanguage that describes
