In Andrea Barrett's extraordinary novel of Arctic and personal exploration, maps are deceitful, ice all-powerful, and reputation more important than truth or human lives. When the Narwhal sets sail from Philadelphia in May 1855, its ostensible goal is to find the crew of a long-vanished expedition--or at least their relics--and be home before winter. Of course, if the men can chart new coasts and stock up on specimens en route, so much the better.
