In this book, the author explores how search media can be incorporated into freedom of expression doctrine, as well as media and communications law and policy more generally. And the book develops a theory of the legal relations between national governments and search media providers on the one hand and between end-users and information providers on the other. Among the many issues covered are the following: role of government under the right to freedom of expression; lack of transparency about the ranking and selection of search results; search engine and ISP intermediary liability; filtering by access providers; freedom of expression and the governance of public libraries; the search engine market, its business model and the separation rule for advertising; search engine self-regulation; user profiling and personalization; decisions and actions for which search engines should be able to claim protection. The analysis draws on specific legal developments under Article 10 of

the European Convention on Human Rights and the United States First Amendment, and investigates issues of diversity, pluralism, and freedom of expression as they relate to editorial control in other media. The author concludes with recommendations regarding search engine governance and the proper role of government, indicating which existing elements of the regulatory framework for search media can be improved and offering directions for future legal and empirical research. Considering the ever-growing cultural, political, and economic importance of the Internet and the World Wide Web in our societies, and the societal interests involved in the availability of effective search tools, this first in-depth legal analysis of search engine freedom will prove indispensable to the many practitioners and policymakers concerned with freedom of expression in the digital age.

climb – that final-year research project. Don't worry, because with this book guardian angels are at hand, in the form of four brilliant academics who will guide you through the process. The book provides you with all the tools necessary to successfully complete a final year research project. Based on an approach that has been tried and tested on over 500 projects, it offers a simple step-by-step guide to the key processes involved. Not only that, but the book also contains lots of useful information for supervisors and examiners including guidelines on how to review a final year project.

The authors give 61 cases of graduate students who are experiencing problems with their research projects. Each case is cast as a dialogue between a professor and a troubled student who is seeking the professor's help in solving a particular problem.

resources; conducting research; and ways to overcome the hardships they face while researching, writing and preparing their dissertation for submission. Thesis writing is an essential skill that medical and other postgraduates are expected to learn during their academic career as a mandatory partial requirement in order to receive the Master's degree. However, at the majority of medical schools, writing a thesis is largely based on self-learning, which adds to the burden on students due to the tremendous amount of time spent learning the writing skills in addition to their exhausting clinical and academic work. Due to the difficulties faced during the early grooming years and lack of adequate guidance, acquiring writing skills continues to be a daunting task for most students. This book addresses these difficulties and deficiencies and provides comprehensive guidance, from selecting the research title to publishing in a scientific journal.
