Along with Esoteric Technologies, Lee has created two software report writer programs written specifically for the classical astrologer: Solar Writer/Medicus, for medical questions and decumbitures; and Solar Writer/Classical, for natal delineation in the matter-of-fact style of the Renaissance astrologer.

Medical Astrology is no longer a specialty that only a few astrologers can learn to use, as was the case for the last century. Presented here is a step-by-step approach to teaching the logic of this field, which traditionally was part of every natal astrologer's work. Included are natal, horary, and electional methods, as well as an extensive history of medical astrology and its uses. Dr. Lehman offers the traditional astrological methods for this system, also emphasizing that medical astrology was always an adjunct to medicine, not a complete system by itself. This book is designed for the intermediate student in astrology who wants to learn the basics of how this system works. Both theory and practice of these methods are taught.

Electional Astrology addresses the age-old challenge of creating charts for inceptions, such as the start of an activity or an entity (like a corporation). Electional is a popular request among astrology clients who often ask for dates and times to start a business, sell a property or car, start a job, a marriage, or an educational program. In this groundbreaking work, Dr. Lehman presents the traditional astrological methods for these and many types of events, fully updated to modern life. Find out how to use the ancient rules for warfare to pick a time for a divorce, a strike, or a lockout. Explore events as diverse as running in a marathon, picking a time to execute a medical power of attorney, or filing one's taxes. This comprehensive book presents a full history, as well as over 113 completed examples detailing how electional astrology charts work. These methods do not require prior knowledge of classical astrology, although it would be helpful.

Using methods developed by ancient Astrologers, Lee Lehman works to strengthen techniques used by Astrologers today. The task of Classical Astrology today is twofold: to recover these techniques and to evaluate and understand them within a modern context. She presents both techniques and the logic behind them to radically improve all Astrology, regardless of whether the practitioner chooses to adopt a Classical or Neo-Classical approach. She analyzes the charts of several famous people and events to demonstrate the techniques and their effectiveness.

The author gives a full history of the origins of temperament in astrology, then shows clearly and succinctly how readers can work to assess temperaments themselves. Copious case histories support her technique.

Through 25 chapters Ms. Barclay guides the reader in understanding how to make and judge a chart, grasp the terminology and aspects of a chart, find answers to questions through a chart, and appreciate the ancient and modern history of horary astrology. Horary Astrology Rediscovered is a captivating and beautifully written survey of horary astrology and its relationship with other forms of the science. The work of noted experts throughout history, such as Manilius, Al Biruni, Cardan, Antigonus, and William Lilly, among others, perfectly compliments Barclay's text. More than 25 charts and graphs illustrate planetary rulerships, planetary movements, fortitude's and debilities of planets, and answers to questions.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exonerated. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Martial Art of Horary Astrology (2002) was the culmination of over fourteen years of studying, teaching, and practicing classical horary astrology. Now, Lee presents more: not an update, but an addition. Call it Part 2. In this work, Lee adds the sources that have become available since Martial Art, and discusses how to integrate them into practice. And this is a working volume: not only does Lee discuss authors such as M'sh'all'h, ibn Ezra, Bonatti, and Lilly, she cross references where multiple translations are available, and demonstrates their methods in actual horaries, she discusses variations in their methods, again using actual examples, whether discussions of Lilly's horary examples, or charts from her practice. Then, there are example horaries for the reader to study, with answers given in the back.

This reference lists the 4,000+ asteroids named in almost two centuries and explains how the asteroids relate to the events in the lives of the persons, places and objects they share names with.
