The world's population is rapidly urbanizing but the affluence and development often associated with cities are far from equitably or sustainably distributed. Where it was once taken for granted that responsibility for urban development lay with the sta

Reducing your carbon emissions in an economic down-turn can be challenging, but saving the planet doesn't have to cost you more. Tough economic times need not relegate concerns for the planet to the back burner. The author is an environmental economist trying to live a low-carbon life in London. He worked for 15 years in the UK's Office of Climate Change, the Prime Minister's Strategy Unit and the Department of the Environment. So far so good. But he has kids. A family to visit in India. A hectic job. In distilling and building on his own experience of trying to live a low carbon life, he helps us navigate the choices that confront us all - families, singletons, pensioners - when making decisions about what to eat, what to buy, how to travel and how to keep warm in the era of climate change and economic turmoil. He works out the sums and lets us know which choices will make the biggest difference, and which are false savings. His book is an irreverent but seriously rigorous reference guide to low-

cost, low-carbon living for everyone - in any location - in tough times. It's brimming with up-to-date information on current and future technologies, tips and ideas for every budget on how to spend the least for the biggest carbon reduction gain and insight from the experiences of people trying to live low-carbon lives.

This new edition has been tailored exactly to the 2000 specifications and provides all the background information and activities required for the mandatory units of GNVQ Advanced Business. Written by two highly experienced authors, the book offers a clear well-illustrated text supported by:

- * Up-to-date case studies
- * Numerous activities
- * A clear summary of 'what you need to learn' at the start of each chapter
- * End-of-chapter tests
